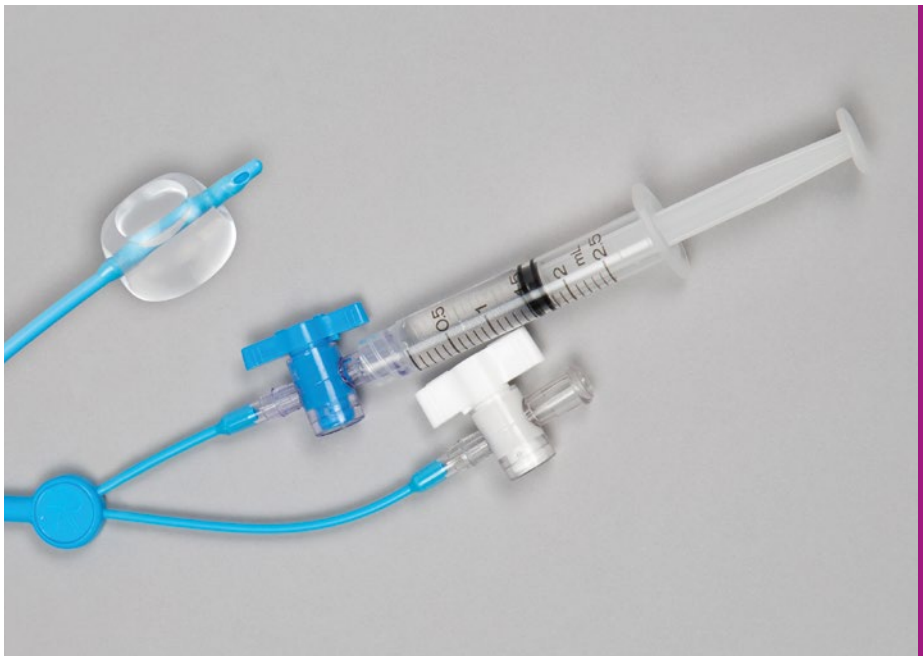
Rocketmedical

Reproductive Medicine

HyView® HSG and HyCoSy Catheters



Rocket Medical provides a range of products for Reproductive Medicine, including catheters for use in HSG and HyCoSy diagnostic procedures, which are commonly performed during the investigation of female infertility.

Rocket Medical strives to deliver high quality products to support clinicians, and ultimately patients along their fertility journey. Our latest innovation sees the introduction of a catheter that can be used with a wide range of aqueous or oil-based imaging media, including x-ray contrast, sonographic foam and saline.

Rocket Medical HyView HSG and HyCoSy balloon catheters have proven resistance to both oil-based and aqueous media for up to 60 minutes.

CONFIDENCE

- Resistant to a wide range of aqueous or oil-based imaging media, including x-ray contrast, sonographic foam and saline
- Proven performance for up to 60 minutes of contact time

EASE OF USE

- Includes stopcock, for easy top-up of imaging medium as required
- Available with and without an integrated wire stylet, which can be pre-shaped to the patient anatomy to aid insertion

PATIENT CARE

- Low profile balloon to help reduce patient discomfort on insertion and removal
- Insertion sheath to aid catheter insertion in the retroverted or anteverted cervix, without the use of a tenaculum

DESCRIPTION	SIZE /FG	ORDER CODE
HyView HSG and HyCoSy Catheter	5	R57432
HyView HSG and HyCoSy Catheter with Integrated Stylet	5	R57432-00-ST
HyView HSG and HyCoSy Catheter	7	R57433
HyView HSG and HyCoSy Catheter with Integrated Stylet	7	R57433-00-ST

TECHNICAL INFORMATION

- Compatible with oil-based and aqueous imaging media
- Catheter size: 28cm long
- Maximum balloon fill: 1.5mL saline or air
- Syringe volume: 2.5mL
- Tip: closed with sideport
- Latex-free
- Sterile, for single use
- Packed in cartons of 10 units
