IPC

Rocket® IPC™ Catheter Insertion Sets

Rocket® IPC is indicated for intermittent, long term drainage of symptomatic, recurrent, pleural effusion, unresponsive malignant pleural effusions and abdominal ascites.

Rocket® IPC offers an alternative long- term method of managing pleural and peritoneal ascites allowing patients to be managed in the community which offers significant advantages:

- Early discharge
- Minimised repeat admission.
- Improved quality of life
- Improved control over breathlessness
- Reduced cost

Code	Product	Catheter	Kit Contents
